

Custom new product work flow

- Step1 customer send drawing to us
- Step2 we quote mold fee and unit price according to the drawing
- Step3 customer evaluate the price
- Step4 customer accept the price and pay for the mold fee
- Step5 we make the mold
- Step6 we make the samples
- Step7 we send the samples to customer by DHL or other express
- Step8 customer test the samples (if samples failed, inform us and return to step6)
- Step9 samples passed the test, then customer place an order
- Step10 customer pay the advance payment (30% order amount)
- Step11 we manufacture, test , and packing the products, then inform customer
- Step12 customer pay the residual payment
- Step13 we send the products to customer and freight collect
- Step14 customer receive the products and test them

Successful cooperation
